Divar Cars — Data Audit Report

Source: Kaggle arianghasemi/divar-cars | File: final2024.csv

Dataset overview

Metric	Value
Rows	406,923
Columns	19
Exact duplicates	74
Missing cells	1,797,838 (23.25%)
Completeness score	76.75/100
Time min	2020-07-18 00:00:00
Time max	2024-06-24 00:00:00

Inspection scope

This audit includes dataset loading, structure and shape inspection, schema and dtype review, numeric/categorical summaries, missingness and duplicate analysis, unique values, validity checks, price distribution, numeric and categorical distribution summaries, IQR outlier flags, correlations, feature relationships via correlation, temporal/geographical coverage, consistency review, quality assessment, comparison scenarios and report generation.

Price summary

Metric	Value
count	393,827.000
missing_count	13,096.000
mean	582,514,934.341
median	320,000,000.000
std	1,153,477,365.145
min	0.000
q1	165,000,000.000
q3	590,000,000.000
max	50,000,000,000.000
skewness	10.437
positive_count	385,169.000
zero_or_negative_count	8,658.000

Audit observations

Exact duplicated rows detected: 74. Missing-cell percentage: 23.25%. Statistical outliers are flagged, not removed. Raw values are preserved; Persian digit conversion is applied for selected numeric analyses. The comparison report does not use an external dataset because none was provided.

See accompanying CSV reports and HTML report for per-column findings.
